

MoxieDori Face Mask Extender

FACE MASK EXTENDERS

Pull elastic away from ears to adjust fit and alleviate discomfort due to extended face mask use in the workplace. Small or large quantities available, affordable bulk pricing, inventory in stock, ready to ship. 100% made in the USA.

The wearing of face masks for extended periods of time, during long shifts, can result in soreness behind the ears. Uncomfortable working conditions can result in workers with lowered morale and decreased productivity. Face Mask Extenders ensure a proper and comfortable face mask fit.

MoxieDori, Inc., a small, woman-owned product design and manufacturing company in Northeast Ohio, is now a major supplier of face mask extenders in North America. The materials we use and the product we ship is proudly made right here in the USA.

- **Adjustable fit, comfortable, pliable material conforms to head without pressure, compatible with any ear loop mask, will not interfere with face shield or goggles**
- **Durable, thin, lightweight, tear-resistant, flexible, waterproof, safe to disinfect, non-toxic, odorless, not considered a hazardous material at temperatures below the melting point of 120°C (248°F)**
- **Manufactured in Northeast Ohio using material produced in the United States.**

We are a reliable, established business that has produced and delivered thousands of our mask extenders all over North America to hospitals, correctional facilities, city governments, and manufacturing plants. We utilize secure, trusted, reliable supply chains, value exemplar customer support, and offer competitive pricing. We ship both domestically and internationally. Our production capacity is scalable to 100K+ units per week.
